Professional Profile

Civil Engineering in Computer Science, specialized in web development. I gained practical experience through university projects and professional internships at Serviu Bío-Bío, providing technical and development support to the IT team.

Academic Background

Secondary Education | 2014 – 2019

Liceo Bicentenario de Coronel

Higher Education | 2020 – 2024

Civil Engineering in Computer Science, University of Bío-Bío

Work Experience

- Internship 1 (Serviu – Support Area): Provided technical support, solved problems, and developed a service catalog for the development area, as well as updating the existing one for the support area.
- Internship 2 (Serviu – Development Area): I participated in meetings about a project where part of the work had already been completed. During this time, I learned about Azure DevOps and .NET 5. Additionally, I was assigned a case where I gathered requirements, created user stories and designed a webpage to meet the identified needs.

Technologies I've worked with:

- Version control: Git
- Frameworks: React, Angular
- Databases: MongoDB, PostgreSQL
- API testing: Postman, Thunder Client
- Languages: HTML, CSS, JavaScript, TypeScript, Python, C#

Additional Education

- LinkedIn: Essential Programming Fundamentals.
- Platzi: Good Practices and Clean Code in C# course.

Skills

- **Self-taught.** Able to independently learn and apply new technologies through research and practice.
- **Efficiency.** Committed to completing tasks promptly while ensuring quality and attention to detail.
- **Leadership.** Led a team of five in researching and implementing Angular 17 upon its release. Conducted initial research and guided team members in the development of a web application using this technology.
